**EXAMINER'S AMENDMENT**

***Remark***

- This Office Action is in response to applicant's amendment filed on October 15, 2009 which has been entered into the file.
- By this amendment, the applicant has amended claims 1, 6, 9, 15, 17, 18, 19 and 23.
- Claims 1-10, 13-20, and 22-23 remain pending in this application.

***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Edward Wise on February 4, 2010.

**The application has been amended as follows:**

**In the claims:**

10. (Current amended) The method according to claim 1, further comprising:

generating a reproduction reference beam having the determined address to retrieve the target data page; and

irradiating the holographic recording medium by the reproduction reference beam to reproduce the target data page.

13. (Current amended) The method according to claim 8, further comprising:

generating a reproduction reference beam having the determined address to retrieve the target data page; and

irradiating the holographic recording medium by the reproduction reference beam to reproduce the target data page.

14. (Current amended) The method according to claim 9, further comprising:

generating a reproduction reference beam having the determined address to retrieve the target data page; and

irradiating the holographic recording medium by the reproduction reference beam to reproduce the target data page.

#### ***Examiner's Reasons For Allowance***

2. The following is an examiner's statement of reasons for allowance: of the prior art references considered, none has disclosed a method for searching holograms to determine the *address* of a target data page recorded in a holographic recoding medium, and a holographic recording and reproducing apparatus that is comprised of an object optical system and a reference optical system for generating object beam and reference beams, respectively, to record multiplexedly a plurality of data pages in a hologram recording medium wherein each data page has a plurality of equally divided data blocks, and a spatial light modulator in the object optical system for *modulating* a signal beam with a *search data page* having a plurality of equally divided data blocks with at least one data block of the search data page consisting of an *encoded searching image*. The hologram recording medium is irradiated with the modulated signal beam to generate *one or more diffracted beams* and a target diffracted beam with the *maximum intensity* of the one or more diffracted beams is detected. The diffracted beams are generated by the recorded data pages in the holograms that comprise an encoded target data image matching the encoded search image. *Determining an address of the target diffracted beam* wherein the address is used to identify a reproducing reference beam and generate the reproducing reference from the reference optical system to illuminate the hologram recording medium to reproduce the target data page recorded in the hologram recoding medium. The encoded search image in the at least one data blocks of the search

dedicated data page is generated by an encoding method wherein the encoding method also encodes the plurality of data pages for recording such that same or different number of ON pixels is encoded for each data blocks within a single data page.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Audrey Y. Chang whose telephone number is 571-272-2309. The examiner can normally be reached on Monday-Friday (9:00-4:30), alternative Mondays off.
